Alberta Site Rehabilitation Program

Mikisew Advisian Environmental is here to help!

Status update on the Alberta Site Rehabilitation Program (SRP)

Initial details for period 5 and 6 of Alberta's SRP were released in November 2020. This release outlined high level details on allocations and eligibility. More details are expected in early February 2021.

$400M in grant funding will be available for periods 5 and 6.

Period 5 and 6 are both open to 50% of contract value grant, with the potential for grants issued at 100% of contract face value where Indigenous contractors are the applicants. Working with an Indigenous contractor enables licensees to have up to 100% of eligible costs covered by SRP grants.

How can we help?

As an Indigenous owned company, MAE can qualify for 100% funding.

MAE has extensive experience in remediation and reclamation for well sites, pipelines, and facilities.

We are able to:

- Submit applications to the program for funding to progress site clean up

- Act as the prime contractor to oversee all activities on site

- Provide professional support for all environmental activities needed to move sites to closure

Who is Mikisew Advisian Environmental (MAE)?

MAE is an **Indigenous-owned Environmental & Engineering consultancy** recognized by Indigenous Service Canada. It is a partnership between the Mikisew Group of Companies (owned by Mikisew Cree First Nation) and Advisian (Worley's consulting business).

MAE's focus is on providing world-class environmental services that incorporate traditional knowledge and values into program designs and scopes while providing career opportunities by establishing education-to-employment programs.

We support all aspects of closure for SRP eligible sites: well sites, associated facility sites, and pipeline right-of-ways.
